

CURRENT RATES REV. 2018

THE WATERS

The waters of Balneario de Zújar are waters of strong mineralization, mixed sulphates. The emergency temperature from the aquifer ranges from 39 degrees to 41 degrees. Its most noticeable characteristic is the conductivity (10,210 mcS / cm) well above the Andalusian average, allowing the body to absorb its mineralization easily.

Declared since 1928 as mineromedicinals, we highlight its indication for:

- Rheumatological problems.
- Musculoskeletal problems
- Symptoms of the nervous system.
- Faces of the skin.

THE HOTEL

Located in the hillside of Jabalcón overlooking the Negratín reservoir, surrounded by nature, it is a rural accommodation with 27 comfortable rooms equipped with heating, air conditioning, hairdryer, television, Wi-fi, each with a different decoration.

Double Rooms, Double Rooms with Views, Junior Suites with Jacuzzi ... Request a quote without obligation.

THE RESTAURANT

With splendid views over the Negratín, its lounge with large windows, accompanied by an outdoor gazebo terrace, offers a direct service on a table, both daily menus and a la carte meals or special menus for events in which products are combined of the land that unites traditional cuisine with new gastronomic trends.

Prepare your event in our facilities: communions, business meetings, weddings, birthdays, dinners ... we advise you.
